

Nature Faces

Activity sheet

Create your own nature face using natural materials found along the river

You will need

- An egg box

1 What does your face need?

What colour, size and shape are the eyes, ears, nose, mouth, eyebrows, teeth?

Does your face have hair, a beard or wear glasses?

2 Look for natural materials found along the river bank to create your face.

These could include tree bark, twigs, grass, moss, flowers, shells, small stones, tree seeds, sheep wool, this list is endless.

3 Collect a few and put them in your egg box. When you've found everything you need, create your nature face!

Why not leave your nature faces for other people to discover. You never know, maybe more will appear! We'd love to see your nature face, why not take a photo of it and email it to office@edenrt.org !

Take it further

Don't stop at nature faces, why not create something else - a fish, a bird, a tree, a flower, or maybe a rocket.

Why not construct a piece of creative writing about your nature face or download the photo into Picassa or an app such as Instagram to re-create your face in different artistic styles!
