

Nature's Shapes Activity Sheet

14
32+

Explore the outdoors to discover nature's shapes

You will need

- a pencil
- activity sheet

Butterflies, bugs and beetles

© John Stock

Bricks and paving stones

Pebbles along
the river bank

Gates and fences

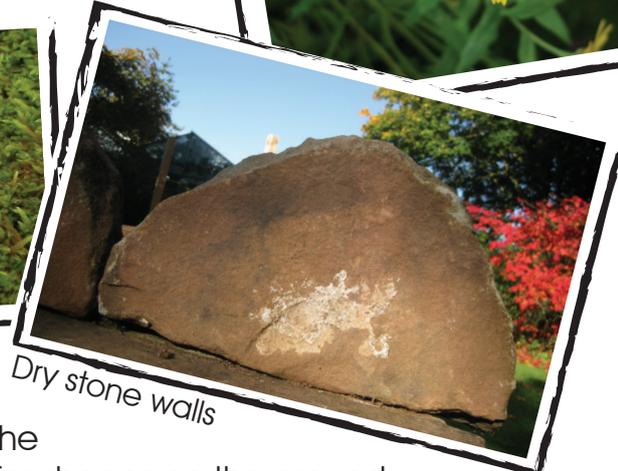

Flowers and
petals

Trees, bushes and leaves

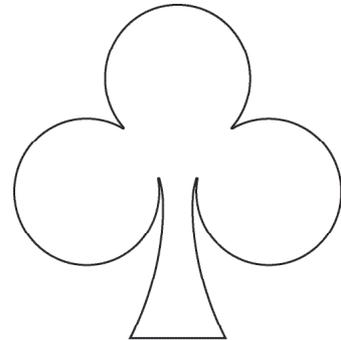

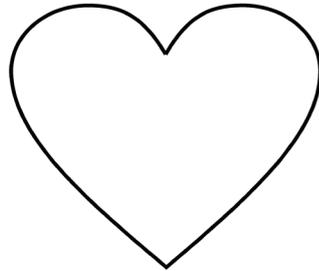

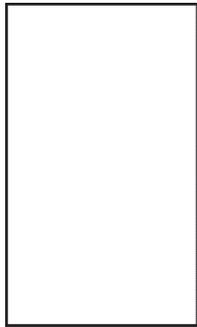

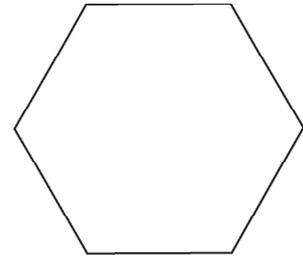

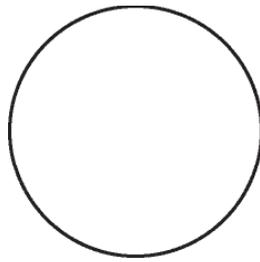

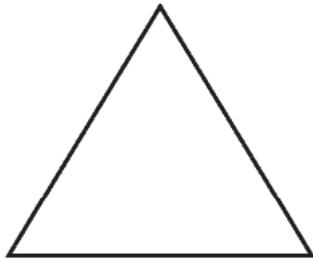

Dry stone walls

You can find so many different shapes in the outdoors. As you walk along the river look for shapes on the ground, in the trees and in the sky. They could be natural or man-made, they could be large or really tiny.

Note to parents: If time is short, why not take a photo of them with your mobile phone and complete the worksheet at home?

These are a few examples but try and spot other more unusual shapes. Remember: in nature the shapes won't always be as defined as these.

Object	Shape	Natural or man-made	Number of sides	A sketch of my shape
fence	hexagon	man-made	6
